

These symbols mark some of the spectacular trees worth seeking out on your next visit...

0 100 200 300m

Recently, a new species of *Disanthus* has been described from North Vietnam, though some regard it as belonging to its own genus, having previously gone under the name of *Ucodendron whartonii*.

Tree guide

-  **Parrotia persica**
-  **Disanthus cercidifolius**
-  **Liquidambar styraciflua**
-  **Liquidambar orientalis**
-  **Liquidambar acalycina**
-  **Worplesdon**

Please confirm that this is the correct label and placement of trees for orange label.

The common name of Persian ironwood is apt as the species is renowned for its solid wood.
